On 28 August 2020, GGML donated medical equipment and supplies for use at the Sekou Toure Regional Referral Hospital's orthopedic and traumatology units. The donated equipment includes orthopedic surgical kits, an ECG machine and illuminator amongst others. Speaking during the brief handover ceremony on behalf of the Managing Director, GGML’s Chief Medical Officer, Dr. Aalen Mtemi Rusasa said the donation was borne from existing good relations between the Mine and Sekou Toure Hospital.

“In responding to the medical items request in the areas of orthopedic, physiotherapy and internal medicine that was meant to strengthen patient care at this (Sekou Toure) hospital, GGML reached out to Rafiki Surgical Mission from Australia for support. This continues our long-standing collaboration over the years and we are optimistic that the equipment will support to a great extent medical care at this hospital,” said Dr. Mtemi.

Geita Gold Mining Limited in collaboration with Rafiki Surgical Mission from Australia for almost 20 years have been dedicated to helping children and adults in the region who suffer from unrepaird cleft lips and palates by providing free surgical treatment. Upon receipt of the equipment, the hospital's Chief Orthopedic Surgeon, Dr. Kelvin Nyakimori commended GGML for the donation.

Geita Gold Mining Limited in collaboration with Rafiki Surgical Mission from Australia for almost 20 years have been dedicated to helping children and adults in the region who suffer from unrepaird cleft lips and palates by providing free surgical treatment. Upon receipt of the equipment, the hospital's Chief Orthopedic Surgeon, Dr. Kelvin Nyakimori commended GGML for the donation.

“At times we have been overwhelmed with patients seeking medical attention and we have had to refer them to Bugando Hospital for further treatment but the equipment will help us reduce referrals and shorten surgical appointments as we will be in a position to provide better health care. We are truly grateful,” said Dr. Nyakimori.
