

GGML receives best investor award at the 3rd National Forum on Local Content

Geita Gold Mine (GGML) has embraced the Local Content Regulations and strengthened its support for socio-economic development in the Geita region to build the confidence of micro and small enterprise owners to not be afraid to engage in local and international procurement activities.

The signing of the capacity building programme between GGML and the National Economic Empowerment Council (NEEC) has increased the transparency of GGML's procurement standards and made it easier for local businesses to supply one of the largest employers in the region.

GGML received the best investor award at the the 3rd National Forum on Local Content held at the UDSM New Library Auditorium in Dar es Salaam, for its long-standing commitment to increasing local content. The two-day event was held from 13-14 December 2021.

Although participation of Tanzanians in various investments at the national level is still low due to various reasons such as low skill levels, inadequate access to investment capital and insufficient market information among producers, GGML received the top award for expanding its local supplier network to over 300 Tanzanian-owned companies, from which over 75% of all procurement was done in Tanzania.
