

AngloGold Ashanti Tanzania Donates 24 Million TZS Worth of Safety Equipment to Women Miners in Geita

AngloGold Ashanti Tanzania has donated 24 million TZS worth of safety equipment to women miners in Geita as part of our commitment to supporting small-scale miners and the local community!

The equipment was distributed during a safety training session with the Geita Women Mining Association (GEWOMA), covering essential topics such as safe mining practices, environmental responsibility, financial literacy, and mining regulations.

These skills are critical in helping women miners enhance safety, improve sustainability, and grow their businesses responsibly.

We recognize the vital role women play in the mining sector. By providing resources and knowledge, we aim to empower them with the tools needed to succeed safely and sustainably. When women thrive, communities grow. View more pictures [here!](#)
