

## Geita Gold Mining Limited Hosts TRA Lake Zone Delegation For Study Tour

Last week, Geita Gold Mining Limited (GGML) had the pleasure of hosting a delegation from the **Tanzania Revenue Authority (TRA) Lake Zone**, comprising officials from Geita, Kagera, and Mwanza regions. The purpose of the visit was to deepen understanding of the mining sector's contribution to local communities and national development.

The delegation began their visit with a Health, Safety and Environment (HSE) induction, an essential part of any GGML site visit. They were then briefed on our community investment efforts and the broader socio-economic role we play in the region.

As part of the tour, the group visited Nyankanga Pit where they safely observed our open-pit operations in action, gaining a clearer picture of the scale and complexity of our work.

"Visits like this are important for building trust and long-term partnerships," said **Dafroza Manyanda, Senior Officer – Stakeholder Engagement**. "It gives stakeholders a chance to see the direct link between our day-to-day operations and the economic and social impact we're making in the Lake Zone."

**Thank you to all who contributed to the success of the visit.** It's through our collective efforts that we continue to build strong relationships and demonstrate the positive impact of our work.

**Be sure to follow us on social media for the latest updates.**
