

Meet the geologist behind the models shaping our future

At Geita Gold Mine, Esther Maghembe's journey reflects the kind of **technical excellence, resilience, and leadership** that continues to shape our business.

After more than a decade at the mine, Esther has grown into a Senior Resource Modelling Geologist whose work helps guide **mine planning, investment decisions, and long-term strategy**. She built that reputation through precision, consistency, and calm leadership in one of mining's most demanding technical spaces.

Along the way, she also balanced **career growth, motherhood, and mentorship** while helping open doors for the next generation of women in mining. Today, she leads a team of more than 10 professionals and continues to **show what is possible when talent is supported and given room to thrive at GGML**.
